Red Hat Lab – Chapter 17

Use **Red Hat Lab** Environment to complete the labs. Issue the following commands immediately before step 1:

```
history -c
history -w
```

These commands should be repeated for each user@machine prompt. See boxes below.

Paste a screenshot in the box below of the command output from the command below. Include the command itself in the screenshot:

lab grade rhcsa-rh124-review1

Issue the command `history` after the last step. Paste a screenshot of the history in the box below. Include the command itself and the full history of commands.
